CHELSEA

Charles F. Dutton returned the first of the week from a brief business trip to Boston.

Fred A. Ordway returned Wednesday evening from a few days' business trip to New York.

Dr. and Mrs. Marcus H. Corwin returned Friday afternoon from Randolph where they spent two or three days with friends.

Mrs. Jane Reed, widow of the late George F. Reed went last week to Brookfield to remain for a few weeks with relatives.

Mrs. Fred W. Lewis and daughter, Miss Rosemary, left early in the week for a trip to Boston and vicinity, where they will be the guests of friends.

John Hoyt, Jr., of Corinth, who is a junior in the high school at Burlington, is on a few days' visit to his home and was a guest of his uncle, Albert W. Hoyt, Friday.

Miss Eudah Larkin is taking a two weeks' vacation from her work as table girl at the hotel and is spending the same with her parents, Mr. and Mrs. E. L. Larkin, on the East Hill.

Three of our local carpenters, Charles E. Godfrey, Fred W. Lewis and Will C. Goodwin have been busy during the week in putting on the finish and laying floors in the annex to the jail.

Ben. A. Goodrich, who has been ill for over a week has developed pneumonia and is seriously ill. Miss Tassie Sprague, a professional nurse from Manchester, N. H., is caring for him, and his many friends hope for his speedy recovery.

While playing at noon time recently, Miss Marion, daughter of Mr. and Mrs. Carl M. Beckwith found a gentleman's hunting case gold watch among the board piles in Fred Goodwin's mill yard. The front case bears the initials B. G. in monogram.

MONTPELIER

Senator William P. Dillingham, who has been on a trip to Honolulu arrived in this city from Waterbury Saturday afternoon.

Fifty of the students of Montpelier seminary went to Curtis pond Saturday afternoon to attend a husking bee held there. An oyster supper was served and a general good time was had by all.

The new steel filing cases for the probate office in the county court building have arrived and will be installed immediately. Most of these cases will be placed in the vault and are of the latest design.

The concreting of the city hall was finished Saturday except for a few finishing touches. The flooring is all completed but the forms will be allowed to stay in place for about two weeks before they are removed.

The last football game of the season here will be played Saturday between the high school and the seminary. In the former game the hill boys won by a score of 17 to 0. Both teams are working hard for this game.

The water department has nearly completed the construction work on Pleasant street and will put water into the new Bradshaw house in a short time. The work on this street was very difficult as the digging of the ditch necessitated a good deal of blasting.

The Ladies Aid of Heaton hospital met with Mrs. C. P. Pitkin Friday afternoon and made arrangements for sewing meetings this winter. The ladies will provide most of the furnishings of the maternity ward this winter, which will necessitate a great deal of sewing.

A new feature that will be added to high school life will be the organization of a high school band. The newly formed band now contains 12 members but this number will be increased if possible. Their first appearance will be in the game between the high school and the seminary where they will run opposition to the new band recently formed of seminary students.

A healthy man is a king in his own right; an unhealthy man is an unhappy slave. Burdock Blood Bitters builds up sound health—keeps you well.

"Suffered day and night the torment of itching piles. Nothing helped me until I used Doan's Ointment. It cured me permanently."—Hon. John R. Garrett, mayor, Girard, Ala.

Harsh physics react, weaken the bowels, cause chronic constipation. Doan's Balm operates easily, tones the stomach, cures constipation. 25c. Ask your druggist for them.

Accidents will happen, but the best regulated families keep Dr. Thomas' Electric Oil for such emergencies. It subdues the pain and heals the hurts.

It's a Top Notch Doer.

Great deeds compel regard. The world crowns its doers. That's why the American people have crowned Dr. King's New Discovery the king of throat and lung remedies. Every atom is a health force. It kills germs, and cures and la grippe vanish. It heals cough racked membranes and coughing stops. Sore, inflamed bronchial tubes and lungs are cured and hemorrhages cease. Dr. Geo. More, Black Jack, N. C., writes "it cured me of lung trouble, pronounced hopeless by all doctors." 80c, \$1.00. Trial bottle free. Guaranteed by Red Cross Pharmacy.

Don't Wait Till Night

The moment you need help, take a candy Cascaret. Then headaches vanish, dullness disappears. The results are natural, gentle, prompt. No harsher physic does more good, and all physics injure.

WHY STARS TWINKLE.

Two Theories Are Advanced Both of Them Plausible.

It is known that only the stars twinkle—the planets giving out a steady light. That is the way we tell a star from a planet with the naked eye. But why does the star twinkle at all? The answer to this seems to be on account of the greater distance of the stars, the nearest fixed star being several thousand times further from us than the furthest planet. So around this as a starting point have been built two theories. One is that as the visual angle, or angle subtended by the star from the eye, is so very small that very small bodies in space coming between the star and the eye would give the effect of twinkling. Now as regards those small bodies actually being in space as hypothesized there is no doubt, for there are millions of fragments of disrupted worlds flying around in orbits about the sun.

The other theory is whether there are enough to cause the eternal twinkling that is observed. Science cannot say that enough do not exist, for she cannot perceive the existence of the smallest fragments that actually could cause this effect, even with her finest instruments. To illustrate, then, my meaning as regards this covering of the visual angle—suppose you take a dime between your thumb and finger and hold it between your eye and the moon until it just covers the moon. It will be found to be quite close to the eye. Now take a quarter and hold it so it just covers the moon. The distance is at once seen to be about four times the dime's from the eye. Thus it is seen that the further outward the object is placed the larger the object necessary. This is in accord with what is known as the law of inverse squares.

But now take a dime, or even a pin-head, and no matter how far you hold it from the eye it easily covers the largest star in the heavens. This is on account of the enormous distance of the star—the lines drawn from its sides to the eye enclosing an angle so minute that almost anything will fill it. So thus we see that this theory is not impossible, though perhaps somewhat improbable.

The other theory bases its argument on the air currents. Air currents are caused by light and heated air rising and cold and heavy air taking its place. Now when light goes from a heavy to a light gas, or vice versa, it is bent one way or the other. So this would certainly happen to the light from all the heavenly bodies. The reason it is not noticed in the case of the planets or the sun is that they send us many more rays as compared to the stars.

Many reasons are put forward to show the truth of this theory. A star twinkles more on the horizon than it does in the zenith, for its light has to come through a greater thickness of atmosphere. Also greater twinkling is observed in winter than in summer, and when rapid brilliant twinkling is seen it is a very good prophecy of rain or snow, as it shows the upper regions of the air to be in a state of rapid motion of varying air currents, hot and cold currents meeting, commingling and rotating probably.

This also accounts for the changes in the brightness of a star, for at times a part and not all of its light is bent away from the eye. It has been noticed also that a star's color has something to do with its twinkling on account of the different refractivities of the different colors. A white or blue star, such as the Dogstar, twinkles most, next comes the yellow and last the red. If one cares to look for a red star, Betelgeuse is one and can be found in one corner of the constellation Orion.

A rather interesting thing has been ascertained in astronomy as regards the relation between the color of a star and its age. The white or blue stars are considered young or in the prime of life, with many more million years to their career, while a red star, as Betelgeuse, is on the wane and will gradually go out in the next few million years. The yellow stars of course, come between the blue and the red in point of age. It is encouraging to find that our own sun is classified as a white star. Illustrated Standard Magazine.

PURSUIT OF THE CARIBOU.

May Be Called By Experts Same as The Moose—Color of The Antlers.

In caribou hunting as a rule the open countries are traveled on fine warm days and the greenwoods during stormy spells. It is the unanimous opinion of those who have followed the sport for many years that a lengthy trip should be planned to insure satisfaction.

In the country at the headwaters of the Tobique and Nepisiguit rivers, New Brunswick, several weeks or a month are desirable if you want a record head. Should, however, one be hampered for time, a steady hunt regardless of weather conditions is kept up. This is not only the hardest kind of work, but is not satisfactory. Many a time have hunters stalked a herd in the greenwoods. Finally they picked out the apparently best head and brought it down.

As the report echoed throughout the wood the balance of the herd scattered only to reveal as they passed an opening that more than one larger head could have been procured. This after hours of wet, drenching work rather rankles the most sublime temper. For this reason, if for no other, is the late fall preferred, by experienced men to any other time. It may take longer, but there on the hillside in the clearings is the game in full view, and though requiring hours of stalk few mistakes are apt to be consciously made.

Each year adds knowledge to the pursuit of caribou. They are generally found in herds of from three to twenty, and some experts can tell them by the some as moose. This, however, is for short distances such as a hundred yards or so—the call is very high and hard to imitate—when they will have the herd under their charge to investigate.

The color of the antler is governed more or less by the nature of bush on which they glean them of the velvet. The big bulls do not lose one antler as early as the larger specimens of the Newfoundland caribou, though many will drop one antler about the first of November.

Like all creatures bearing antlers, their growth of such blood vessels is regulated by the temperature of the winter and the fall of snow—all of which affects the food supply. If the winter is open, the summer warm, you may look for record heads. They differ from the Newfoundland caribou in that the big bulls always keep the head and do not follow in the rear.—From Fry's Magazine.

GAS, HEARTBURN AND DYSPEPSIA VANISH

A Little Diapiesin Now Will Settle Your Out-of-Order Stomach and End All Indigestion Five Minutes Later.

You can eat anything your stomach craves without fear of indigestion or dyspepsia, or that your food will ferment or sour on your stomach if you will take a little Diapiesin occasionally.

Your meals will taste good, and anything you eat will be digested; nothing can ferment or turn into acid or poison or stomach gas, which causes belching, dizziness, a feeling of fullness after eating, nausea, indigestion (like a lump of lead in stomach), biliousness, heartburn, water brash, pain in stomach and intestines or other symptoms.

Headaches from the stomach are absolutely unknown where this effective remedy is used. Diapiesin really does all the work of a healthy stomach. It digests your meals when your stomach can't. A single dose will digest all the food you eat and leave nothing to ferment or sour and upset the stomach.

Get a large 50-cent case of Pape's Diapiesin from your druggist and start taking now, and in a little while you will actually brag about your healthy, strong stomach, for you then can eat anything and everything you want without the slightest discomfort or misery, and every particle of impurity and gas that is in your stomach and intestines is going to be carried away without the use of laxatives or any other assistance.

Should you at this moment be suffering from indigestion or any stomach disorder, you can get relief within five minutes.

WILLIAMSTOWN

Expense Fellows and Miss Blanche Magoon were visitors at Twin Brook farm over Sunday.

The topic of the union young people's meeting Tuesday evening will be, "Why some do not succeed in life."

The Congregational Ladies' Missionary society will meet with Mrs. E. F. Walker and Miss Alice Walker Wednesday afternoon at 2:30.

Mrs. George E. Newton returned to her home in West Topsham last evening after a two weeks' visit with her daughter, Mrs. A. N. Fellows.

Snow on the hills reminds us that winter is at hand, and we believe that most of us are prepared for it; but the Indian summer is yet due, so says our old friend, Horace White, and we believe he is right.

Our village schools are doing excellent work and the pupils seem much interested in it, which means successful work. The teachers returned from the Burlington meeting much benefited and say they had a right good time and much inspiration from those higher up and of larger experience in educational work. Now for the application of these inspirations in the class room.

GRANITEVILLE.

Regular meeting of Branch No. 12, Q. W. L. U. of N. A., will be held in Tuna's hall Wednesday, October 27, at 7 o'clock. Regular business. Per order cor. sec.

CHALLENGE FROM D. F. DAVIS

D. F. Davis is seeking the worst case of constipation in Barre or vicinity, to test Dr. Howard's new specific for the cure of those diseases.

So confident is he that this remarkable medicine will effect a lasting cure in a short time, that he offers to refund the money should it not be successful. In order to secure the quickest possible introduction D. F. Davis will sell a regular fifty-cent package of this medicine at half price, 25 cents.

This specific of Dr. Howard's will cure sick headache, dizzy feelings, constipation, dyspepsia and all forms of malaria and liver trouble. It does not simply give relief for a time; it makes permanent and complete cures.

It will regulate the bowels, tone up the whole intestinal tract, give you an appetite, make food taste good and digest well, and increase vigor.

AMUSEMENT NOTES

Keystone Dramatic Club Latter Part of Week.

Whenever a popular priced company is billed to appear in Barre, in all its advertising matter great stress is laid upon the scenery, the effects and the specialties, but so little is said about the man thing, the play. The Keystone Dramatic company, which opens at the opera house for a three-day engagement, commencing Thursday, Oct. 28, talks about its plays. In the first place, all new is their claim. All sensational scenery, dramatic action and countless opportunities for genuine laughter. The opening play will be, "Driven from Home," an up-to-date American comedy-drama, Friday, "The Heart of a Hero," Saturday matinee, "In the Heart of the Mountains," and Saturday evening, "Sunshine and Shadows." A strong acting cast has been engaged, headed by Miss Daisy Butch, and some vaudeville will be introduced between each act.

Popular prices, 10c, 20c, 30c, with a limited number of ladies' 15c tickets good Thursday night only. Sale starts Tuesday morning at Kendrick's drug store.

Russell Conwell to Lecture.

The Philadelphia Times, in Dr. Conwell's home city, says of him, "The only lecturer in America who can fill a hall in this city with three thousand people at a dollar a ticket." Barre opera house, Nov. 3.

The Traveling Salesman.

Henry B. Harris will present James Forbes' successful comedy, "The Traveling Salesman," at the Barre opera house, Thursday, Nov. 4, an announcement which is received with decided interest by local theatregoers. "The Traveling Salesman" is one of the most noted hits of recent times. It ran for an entire season at the Gaiety theatre in New York City, four months at the Park theatre, Boston, and was a tremendous hit at the Illinois theatre, in Chicago, where it ran all summer. It is a play of today and its story is based on a phase of American life which abounds in every city and takes that well known type, the commercial traveler, as its central figure. On the opening night in New York, the dramatic writers as well as the public were most enthusiastic over this comedy by a young playwright, who though he had previously written "The Chorus Lady" was really unknown in New York and the big theatrical centers. The young playwright, though his years are few, has had wide and varied experience viewing the world from many points and observing understandingly its different phases.

"The New Eight Bells."

The famous Brothers Byrne, the quartette of fun makers, who have amused so many people by their grotesque acrobatic specialties, will appear at the opera house early next month in the nautical pantomime comedy, the new "Eight Bells." Almost from the time the curtain rises on the first act until it falls after the latest one, the audience is looking and laughing at the Byrne Brothers. Only one of them has anything particular to say. The other brothers carry their part in pantomime. The scenery of "Eight Bells" is constructed especially for these agile brothers, and they go sailing through the windows, jumping headlong through the sides of the houses and tumbling through a trick coach in the most reckless and startling manner. The best scene is in the second act, when the interior of adjoining staterooms on an ocean steamer is shown to the audience. The staterooms are occupied by the Byrne Brothers, and while the ship is rolling in the waves, they introduce some of their best acrobatic turns. This act ends with a terrible storm at sea, which rocks the ship so much that she finally turns completely over, and the inhabitants of the two staterooms are whirled about in a way that is most astonishing. There is a large cast of characters in the production of the new "Eight Bells" and many medleys, songs, dances, and imitations. Some pretty and vivacious young women figure in the entertainment, and the plot running through it is funny in its situation.

One Cough
A cough, just a little cough. It may not amount to much. Or, it may amount to everything! Some keep coughing until the lung tissues are seriously injured. Others stop their cough with Ayer's Cherry Pectoral. If he says, "Take it," then take it. If he says, "No," then don't. How long have you known it?

Friction Bearings or Ball Bearings—Which?

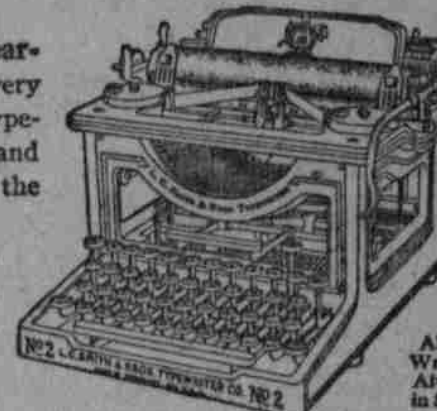

L. C. Smith & Bros. Typewriter with Gardner Ball Bearing Joint

The ordinary friction bearing will wear loose. Each revolution or vibration grinds out a small portion of the bearing surface. After a while it wobbles—adjustment permanently ruined.

The New Model

L. C. Smith & Bros. Typewriter

is fitted with Ball Bearings throughout. Every vital wearing part—type-bar joints, carriage, and typebar segment—has the kind of bearings that thousands of operations cause to run even smoother than at first.
